

# KNOWLEDGE AND TRADITION

Master's degree programme  
**FOOD SAFETY**

## WHY STUDY AT OUR FACULTY?

Students studying at our faculty get the necessary theoretical and practical knowledge needed to be successful in agricultural fields such as food production, nature conservation in food production and the ethical treatment of all living organisms. They also get the skills needed to tackle and solve complex problems in the field of agriculture.

Would you like to upgrade your existing knowledge in food safety?

## STUDY PROGRAMME

The study programme is designed to comply with interdisciplinary and international measures and is the only one of its kind in Slovenia.

It is a combined study programme of the Faculty of Agriculture and Life Sciences and the Medical faculty at the University of Maribor and strives to provide a master's degree programme on the safety of food within the food chain that includes fields such as biotechnology and medicine.

The programme will enable the students to gain the necessary knowledge and competences needed to be active in the fields of food production, public health and health education and cooperation with the general public.

## PROGRAMME GOALS AND OBJECTIVES

The study programme is the only one of its kind in Slovenia and is designed to comply with interdisciplinary and international measures. It is a combined study programme of the Faculty of Agriculture and Life Sciences and the Medical faculty at the University of Maribor and strives to provide a master's degree programme on the safety of food within the food chain that includes fields such as biotechnology and medicine.

It contains optional subjects, which enable the students to complement their curriculum according to their future career ambitions, scholarship grants and employers' needs.

## EMPLOYMENT OPPORTUNITIES

The graduates will have excellent competences for working in the food production sector, in public health and in educating and communicating within the general public.
